Hiring Committee

Standard Aero

707 Flight Road, Winnipeg, MB, R3H 1C6, CA

Dear Hiring Committee,

I am writing to express my interest in the Server Administrator Summer Intern position posted on your website and additionally on Indeed. As a Data Science student at the University of Manitoba, I believe I would be a great fit for this role. I have always been interested in technology. This brought me to dabble in various hardwares, building computers for both myself and friends. Though small, I have even set up an old system of mine to run Proxmox then switched to TrueNAS during the summer to help with my productivity and optimize file sharing between my laptop that currently runs Arch Linux and Windows desktop. On my Windows desktop, I have also explored many virtualization softwares such as VMWare, Virtualbox and Hyper-V, though I admit, what I've tried on them has been limited to exploring new operating systems without having to reinstall everything on my drive.

As I mentioned, I use an old device as a makeshift NAS, and have even used it to host a Minecraft server for my group of friends. I'm aware the scale and difficulty of the two are very different, but I'm confident the skills I learned during that time will be valuable in this position.

Additionally, through working at H&M for the last few years and becoming a Sales Coach, I have improved my communication and teamwork exponentially. This, partnered with my eagerness to learn and ability to pick up on things intuitively will make me an asset for your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experiences align with your needs. I can be reached at 431-336-0227 or via email at aguilamartin11@gmail.com.

Sincerely,

Martin Aguila
