Motivated and detail-oriented Data Science Student at the University of Manitoba eager to apply my learning in a professional working environment. Great at problem-solving, logical thinking and collaborating effectively in team settings, with experience on using tools such as Python and R through school projects.

Education

University of Manitoba - Bachelor of Science in Data (September 2021 - Present)

- Studying various programming languages including Python, C++, Java
- Focus on software development, working with data and problem-solving techniques

Maples Collegiate - High School Diploma (September 2017 – June 2021)

- Focus on Mathematics and Sciences
- Member of the Audition Chamber Choir and Vocal Jazz groups

Work Experience

H&M — Sales Coach
November *2022 – Present*

- Assist in training new employees, ensuring they meet company standards for performance and customer interactions.
- Provided actionable feedback to improve team performance and increase overall store efficiency.
- Demonstrated problem-solving skills by addressing customer concerns and resolving issues in real-time.
- Drive sales through effective teamwork, resulting in meeting or exceeding daily and hourly targets.
